### TABLE SKIRTING SIZE CHART

- The table below is an expanded list of skirting lengths to fit a wide assortment of tables and configurations.
- For tables and configurations not listed, measure the perimeter and add 6" for the proper skirting length
- To calculate the skirting length required for round tables, use the following formula:

$$\frac{\text{Diameter} \times 3.14}{12} = \frac{\text{Skirting length in feet.}}{\text{(Round-off to the next 6" increment)}}$$

- Standard Snap-Drape Skirting is finished to 29" vertical height, to fit 30" high tables.
- Table heights will vary according to manufacturer
- We recommend that skirting be one inch shorter than table or stage height to allow proper hanging.
